

SEE IT. MAP IT. DO IT.®

ORGANIZE YOUR GARAGE

SEE IT

SEE IT - Take a look at where you are now. Answer the questions for the whole garage including specific areas such as tool and equipment storage.

- What's working? You can be specific or general.
- What do you like (if anything) about the look, feel and function?
- Are there things you know you want to change?
- What isn't working? What don't you like?
- Is there stuff that doesn't belong here, like donations and past time stuff?
- Be honest... is your garage a dumping ground because you just don't know what else to do with the stuff?

MAP IT

MAP IT - Make a written plan for what you want the most for this space. The garage is often the first place we see/enter as we arrive home. It matters.

- How do you want your garage to look, feel and function?
- Create an online board of images that inspire you.
- Create a mind map showing all the elements you want.
- What do you want most from your garage? (i.e. to park cars, storage for tools, yard equipment, outdoor gear, etc.)
- Allow yourself to think differently about the garage. For example, would you appreciate having the walls finished? Look at pictures for inspiration.
- What do you want to add to your garage, like shelves and containers?

DO IT

DO IT - Take the steps to make it happen. Look on your calendar and set up time for the transformation!

- Choose an area to start with. For the garage specifically, we suggest breaking things down into categories and tackling one at a time (i.e. yard tool and equipment, hand and power tools, sports equipment, outdoor gear, decorations, home maintenance items, donations).
- Go through the **S.T.A.C.K.S.® System** for the category (Sort, Toss, Assign, Contain, Keep it up, Simplify). By following S.T.A.C.K.S.® the project will be easier and you will save money. Go to www.clearsimple.com/systems.
- Enjoy shopping for the shelves and containers you want and need.
- Once you complete each category, take time to celebrate. We know you will feel a sense of freedom as you move through each one.
